ABBOTSFORD

Mr. Christmas of Chilliwack is relieving at the Union Oil warehouse, while Mr. Fosset is on his holidays. John Nikkel and Abraham Dyck are in custody, suspected with stealing 39 sacks of oats from E. Wildgrube, Sumas Prairie.

Rev. D. Armitage of Christ Church cathedral, Vancouver, was morning preacher at St. Matthew's last Sunday.

Oscar Olund has the contract for construction of a new sidewalk along the side of the new post office building.

Born.—To Mr. and Mrs. J. Dibben, (nee Geraldine Heller) in St. Paul's Hospital, Vancouver, on October 27, a son, Gerald Richard.

Abbotsford Men's Club "B" cribbage team lost a close evening's play at Poplar on Thursday evening, final tally being 19-17 in favor of the Poplar cribsters.

Mr. H. Thompson, who has been associated with the Pacific Milk Co. for the last three years as their milk grader and field man, leaves today for Edmonton, where he will join the staff of the University of Alberta.

A locally-owned Chevrolet sedan turned over on the roadway between Mt. Lehman and Aberdeen last weekend. It seems the driver suddenly met a horse-drawn vehicle, and in passing went into the ditch. The driver was not seriously hurt, but the car sustained broken glass and bent fenders.

CLAYBURN

Mr. T. Kirkpatrick is very ill at his home.

W. Young is on a motor trip through California and Mexico.

Mr. Ball, manager of the Kilgord brick plant, has purchased a new car.

Master James Bryant of Vancouver was a visitor at the Kayes home over the week-end.

Mr. and Mrs. T. F. Seldon have as their guest Mr. Seldon's sister Mrs. Pomroy of Devonshire, England.

Miss E. H. K. Drake has returned from her visit to New Westminster, and is feeling much better after her short rest.

Miss Lillian Ball, who has been visiting her parents for the past ten days, had to return to Vancouver on an urgent nursing call.

Mrs. H. Wilkinson visited her sister Mrs. H. Turner of Vancouver, and expects to pay a hurried visit to Victoria during the opening of the Legislature.

An enjoyable whist drive was held in the school on Wednesday evening under auspices of the M.S.A. hospital women's auxiliary. Prize winners were Mrs. Vosburgh, Mr. G. Kerr; consolation Miss Hester Drake and Mr. J. Fox.

Celebrate Silver Wedding

In honor of Mr. and Mrs. Sam Young, who celebrated their silver wedding anniversary on October 19, members of Clayburn community gathered at the school on Saturday evening. Mrs. Young, formerly Miss Mabel Purvis of Newcastle-on-Tyne, England, and Mr. Young were married in Vancouver immediately on the arrival of Mrs. Young from England. After a short honeymoon spent on Vancouver Island, they took up residence in Clayburn, where they have resided since. Mr. Young has been an employee of the Clayburn Brick Co. for 26 years.

Before proceeding to the school, where eleven tables of military whist were played, Mr. and Mrs. Young were presented with a 32-piece set of Rogers' flatware, by Mr. R. L. McCulloch on behalf of their friends.

Prize winners at the whist were Miss Jean McCulloch, Miss Doris McCulloch, Kenneth Thompson and Ian Sutherland. Consolation prizes were won by Mr. and Mrs. Barker, G. Mutch and K. Gillies. Community singing and dancing were enjoyed.

Suggested name for the new bridge at Westminster is "Patullo Bridge" which has brought forth the remark that it should be "Pay-tolla Bridge".

WANT ADLETS

FOR RENT—4-room house. Apply G. Ferguson, 2066 1st E., Vancouver.

FOR SALE—Young Pigs, different ages; or trade for hay. A. S. Henry, Hazel, B.C. 44p

LOST—Grade Guernsey Heifer, 10 mos. old. J. Mutch, Township road, Matsqui; phone Mission 320. 1n

Delair Milk Plant Has Record Season's Output

The F.V.M.P.A. milk condensary at Delair will close down on November 1st for the annual repairs, which will take at least two weeks to make the necessary changes and renovations to the equipment. In the meantime the milk will be transferred to Sardis.

The local condensary has so far this year shipped out 250,000 cases of condensed milk, at the rate of 1200 cases per day, to all parts of the world. This year's volume of business to date is a record one for the local plant. About 50 employees are engaged by the condensary.

SPORT SIFTINGS

The Abbotsford football team has been accepted into the G.V.A.A. league, and the first game will be played at New Westminster next Saturday. G. Bader has been making a canvass of the town for financial support, and reports a generous response.

With the information that the high school auditorium would be available for basketball two nights a week, local hoopers plan to get into action this season. It is proposed to enter teams in the Fraser Valley league.

Abbotsford high school football team lost to the Mt. Lehman boys on Thursday last at the Jubilee grounds, by a 4-1 score. Mt. Lehman played better combination, and seemed to have practiced more than the locals.

The following players are requested to turn out for the football game in Westminster on Saturday, October 31, leaving Abbotsford at 12:30: Blacklock, Marlette, Plowright, Ralston, Dingley, Davis, Kerr, H. Kelly, F. Kelly, Watson, Bush, Burnell, James, Southam. Bring shorts and boots.

Capacity Crowd Attends Milk Situation Debate

Indicative of the tense feeling of Valley milk shippers was the large attendance at the public debate on the milk situation, held between Dr. Lyle Telford and Mr. Macken of the F.V.M.P.A. on Thursday when Abbotsford Orange hall was jammed to the doors, scores listened from the outside through opened windows, and several hundred persons were turned away.

In opening the debate, Dr. Telford speaking lucidly and forcefully, presented facts and figures on the milk question that he did not understand, and before finishing, did not forget to take a few digs at "the Whigs and Tories".

Mr. Macken, a fluent speaker, in answering Dr. Telford's statements, showed a remarkable knowledge of the milk market, and quoted a large number of statistics without consulting notes.

A heated question period followed, during which Mr. Macken answered a number of pertinent questions from farmers, and then followed a discussion period, when local shippers and one or two Vancouver residents aired their views. Ten-minute wind-up talks by Dr. Telford and Mr. Macken wound up the debate.

Mr. Grant McNeill, M.P. for North Vancouver, was chairman, and did excellently in keeping the meeting in order.

Twenty members were present at the meeting of Huntingdon Women's Institute, held last week at the home of Mrs. E. S. Plaxton. The president, Mrs. Yarwood occupied the chair. It was decided to send the per capita grant for the Federation. Mrs. F. Tapp read a paper, and Mrs. Plaxton gave a demonstration of unusual effects in table decoration.

Mr. and Mrs. P. Gauthier of New Westminster visited at the home of Mr. and Mrs. E. Marion this week.

Miss Gladys Luxton, who has been visiting at the home of Mr. and Mrs. G. Matthews, has returned to her home in Vancouver.

Visitors at the home of Mr. and Mrs. F. Moret on Sunday were Mr. and Mrs. H. Minaker of Port Townsend, Wash., and Mr. and Mrs. L. Minaker of Sumas, Wash.

The M.S.-A. branch of the Canadian Legion plan to observe Saturday, November 7, as "Poppy Day" and hope to have ladies of the district conducting street sales of poppies on that day. Proceeds are for charitable work by the organization.

THE UNEMPLOYED AND OUR ROADS

"The biggest problem facing the B.C. Legislature when it opens for its fall session on Tuesday of next week will be that of finding a solution to the unending flow of jobless migrating to the coast in winter months in quest of work. What steps will the House take to cope with this serious problem, which is of vital importance to the welfare of the province? Or will it make a move at all?"

The Homeless Men's Committee of the Vancouver Council is doing its best in making it possible for all the single jobless men not belonging in this province to get back to their homes in the east, and so far 118 men have been sent away from Vancouver. But it seems a hopeless task for the committee to anyways cut down the numbers who are drifting about the streets of the coast city in search of work. The old alibi that over three-quarters of these men are outsiders is all bunkum. B.C. has her unemployed and the number is not small by any means.

If the provincial government would give more time to the thought of her road problems and less time in thinking up excuses and alibis for the unemployment situation, the jobless question would be a second issue. There is road work to be done in British Columbia, and enough of it to keep every unemployed man in this province off relief for the next ten years.

Almost every district in B. C. is shouting for new or better highways, and all are rightfully just in their demands. So just that in some sections the citizens, having become tired of asking, have taken it upon themselves to do the work which the government nonchalantly refuses to consider.

The B. C. Legislature should adopt the slogan "Better Roads for Better Times" and we repeat again that the unemployment question would be a second issue."—Ashcroft Journal.

WORLD HAPPENINGS BRIEFLY TOLD

Germans involved in automobile accidents henceforth will be submitted to a special blood test proving sobriety or intoxication, the ministry of the interior announced.

Extensions of lines and equipment costing \$6,750,000 will be made this fall in connection with the United Kingdom's government telephone services.

During July 65 persons were killed in highway accidents in Ontario, the Ontario highways department reported. The figure was the highest in any July since 1929.

Provincial relief inspectors checking a plea from Riverside, Essex county, for more provincial help, "found 22 relief recipients driving their own cars," Hon. David Croll, minister of public welfare, said.

Western Canada's wheat crop this year is one of the highest in quality, it was indicated in a report of James D. Frazer, chief grain inspector, to the annual meeting of the grain standard board.

A decline of \$85,000,000 in total cash income of United States farmers from July to August—when farm income usually increases—was reported by the agriculture department.

Declaring baby shows cause jealousy and unhappiness the Mothers and Infants Association at Croydon, England, declined to act on a reception committee at a national baby show in Romford.

Striking suddenly in United States cities from coast to coast, treasury law enforcement agencies had made close to 1,000 arrests and seized several hundred illicit stills in a drive against narcotic and liquor law violators.

Land Salvaged In India

Forty Million Acres Reclaimed By British In Fifty Years

British India leads the world in territory that has been reclaimed or irrigated during the last fifty years, according to the latest report of the Central Irrigation Board of India, just published at India Office, London. The total of desert land irrigated and swamp and marshes reclaimed now borders on 40,000,000 acres, 31,000,000 of which are in British India.

The second country for the amount of land reclaimed in ten years is Italy, with just under 6,000,000 acres. In India the land reclaimed alone amounts to 7,000,000 acres; the balance laid down to cultivation has been irrigated.

When the present projects in India shall be completed 50,000,000 acres of land will have been irrigated; today what has been done furnishes work for just that number of people, who own or work crops which give forth \$375,000,000 worth of produce—principally rice and beans, while the quantity of water used daily is about 260,000,000 gallons, extracted from over 75,000 miles of canals and distributed by over 50 great dams and hundreds of smaller ones.

Clear Of Debt

British Columbia Town Celebrates By Burning Paid Off Bonds

A little pile of ashes was all that remained of Ladysmith's \$94,336 bonded debt. When coal mines there closed six years ago the town appeared doomed financially. Last spring a rebirth took place with the establishment of a logging company in this British Columbia town. A giant flagpole was erected on the site where the city's debt was burned, as if to signalize the passing of the coal digging era.

A new prosperity brought by the logging company has enabled the city to pay off its debts to the last cent. The city celebrated the occasion by burning the bonds in a giant bonfire.

Closed Season For Squirrels

All shooting or trapping of red squirrels will be prohibited in Alberta this fall and winter, according to an order issued by the game branch. General scarcity of the little animals resulted in their being put on the protected list. In previous years there had been open seasons from Nov. 1 to March 31.

Completes Long Trip

Marchioness Of Reading Visited United States And Canada

The Marchioness of Reading has returned to England after completing a 10,000-mile transcontinental motor tour incognito.

Travelling with only one companion and a chauffeur in order to study the people of Canada and the United States at first hand, Lady Reading said she was impressed by their vitality and friendliness, especially the young.

"One of the things that particularly struck me in every city and small town I have visited," she said, "has been the latent and super wealth that lies in the youth of the country. Their virility, enterprise and determination, their energetic attack of a job and their large-viewed vision of the future are very stimulating and thrilling to watch."

Lady Reading, whose husband died last December, arrived at New York in May. After visiting friends, attending the two political conventions and being a guest of President and Mrs. Roosevelt at the White House, she started her trip through Canada, returning east through the United States.

She said she disregarded letters of introduction that she had been given, in order not to disclose her identity. As head of the Personal Service, largest voluntary relief organization in England, Lady Reading was particularly interested in observing relief methods. She talked with filling station men, mechanics, W.P.A. workmen, farmers, tradespeople and business men.

"As an interested watcher," she said, "I cannot help feeling that one of the great gifts education and democracy have had to bestow has been the complete freedom from self-consciousness which is so apparent in the youth of the country."

"It is a very striking thing to see the splendid way in which people have spent their money to enrich their cities and states. Universities, hospitals, libraries and monuments have been provided on a scale more lavish than anywhere else in the world."

Made Himself Popular

Berlin's Chief Of Police Stopped Tooting Of Horns

For once the chief of police in Berlin is popular. His plan of marking noisy automobile drivers has brought peace. He ruled that anyone tooting his auto horn too loud or too frequently must have his car painted with a large yellow spot. After a few had received the decoration others became quiet, and peace reigned in the city which not long ago was called one of the noisiest in Europe.

Commodore Gooderham, of Toronto, urges car drivers to take up sailing to learn courtesy, but that's just the trouble. Too many motorists already know how to sail along the highways—too fast.

Crochet an Afghan Square by Square

Household Arts by Alice Brooks

Rising Sun Motif Uses Up Wool Scraps

PATTERN 5668

A soft, warm afghan's practically a necessity when one lies down for a cat-nap, and here's one that even brightens your slumbers. Called "Rising Sun," it's easily crocheted blocks are done in three shades of one color, on a dark background. Thus a stunning effect's obtained. Crochet the blocks in the same, or different, colors and use up scraps of wool. Make a pillow too. In pattern 5668 you will find directions for making the afghan; an illustration of it and of the stitches used; material requirements, and color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The Newest Photography

Trivision Principle Shows Depth And Cost Is Low

A picture of an old man in his shirt sleeves glittered in natural color on the desk of Douglas F. Winnek, 29-year-old Madison, Wis., photographic engineer. The picture seemed to be a frame through which one was looking at a live human being.

Suddenly Winnek picked it up, and the man in the picture seemed to move. An observer could see around the man and look at the scenery in the background. The likeness was round and full and the 8-by-10 photograph had actual depth. Winnek laughed and explained:

"This is the first 'trivision' photograph having three dimensions ever made."

Winnek demonstrated a series of "trivision" photographs, saying he expects the principle to revolutionize motion pictures, photography, Roentgenology, television and graphic printing.

The technique employed—use of cellulose acetate plates embossed with 300 ridges to the inch—will enable each of these fields to adopt pictures showing depth just as realistically as an actual live scene, Winnek said, and the cost is exceptionally low.

Winnek described his process as follows:

The eyes see two pictures in any object, but the brain co-ordinates these, giving the sense of depth. In photography only one picture can be shown by the old process, resulting in a flat, lifeless impression. The new process is simply a method of presenting two pictures to the eye.

This is accomplished through grooving the negative of the film. These grooves are so minute as to be invisible, and are the secret of the entire process. Each groove serves as a tiny lens which breaks the single image into two parts. The completed negative becomes then a mass of tiny two-section pictures.

The negative is developed on cellulose acetate plates, also grooved. These grooves retain the panoramic pictures. When seen from any angle the apparently smooth stereoscope, or print, resolves itself into a separate picture for each eye, and presents a clear, soft, rounded view.

Winnek displayed a picture of fruit in a display window. The scene was in full natural color. Each piece of fruit was outlined in depth and a view from a different angle revealed another piece behind it. The picture was ordinary size, 8 by 10 inches.

Protege Of The Queen

Young Orphan Boy Will Receive A Secondary Education

Queen Mary presented for admission to the Royal Infant Orphanage, Wanstead, a two-and-a-half-year-old orphan boy who will be maintained there and receive a secondary education until he is 16. He is Brian William Frank Roberts, whose father, a chief steward on the Orient line boat, the Otranto, died last year. His mother died at the age of 24.

An official of the orphanage explained Queen Mary had the right of nomination to the institution of two children, so that there is always a protege of hers at the orphanage.

"You say Jake takes everything literally?"

"Yes, he was invited to a housewarming party and he took along some kindling and a box of matches."

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk. A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old, Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else, too.

New Gold Strike

Encouraging Reports Received From Yellowknife Mining Division

Confirmation of a new gold strike in the Yellowknife mining division of the Northwest Territories is contained in a message received by Hon. T. A. Crerar, minister of the interior, from A. L. Cumming, chief mining inspector for the department at Fort Smith, N.W.T.

The message stated the new gold strike is located on the east side of Gordon Lake, about 50 miles north-east of the mouth of the Yellowknife river, where it enters Great Slave Lake.

The original locators of the find were representatives of the Mining Corporation of Canada, who made the strike last July 15, staking 36 claims. Two weeks later, the A.X. Syndicate staked 100 claims in the area. On September 5 staking was carried out by representatives of Ventures, Limited, Fred Connell, the A.E. Syndicate, Karl Springer, Wood-Brown Syndicate, Burwash Yellowknife Mines, Limited. The Mining Corporation and the A.X. Syndicate are planning to carry on development work during "freeze-up."

Interest in the new strike is indicated by activity of companies engaged in prospecting and mining in the Yellowknife mining division. Approximately 600 claims had been staked up to now. Mining Inspector Cumming and Dr. A. W. Jolliffe, geologist of the Dominion department of mines, visited the area. Mr. Cumming's report stated the strike consists of a series of veins, lenses and shearing zones occurring in a belt 15 miles in length with showings of free gold. Width of the veins and lenses would indicate commercial tonnage if the samples stand up under assay.

Sanctity Of Contracts

Maritime Board Of Trade Sees Danger Of Departure From Rigid Honesty

"A definite and apparently increasing tendency in certain quarters to depart from that rigid honesty involving sanctity of all contracts and obligations, provincial, municipal and personal" was noted by the maritime board of trade.

In a resolution passed at the closing session of the annual convention which expressed "gravest concern" in view of the trend, the association sought to "earnestly impress upon the federal government its profound seriousness."

Sanctity of all contracts and obligations in the past had been accepted everywhere as traditionally and characteristically Canadian, the resolution stated.

The federal government was urged to use its "full prerogative to maintain the credit and standing of all Canada because of the 'inevitable' consequences upon the credit and reputation of the country" of the departure from traditional and characteristic honesty observed, the resolution concluded.

Butter Increase

A new record for creamery butter production was established in Saskatchewan during 1935 when the output reached the total of 22,853,859 pounds. This is almost two million pounds in excess of the previous high mark set in 1934.

Eulogized Canadians

People Have Accomplished Miracles States London's Lord Mayor

Sir Percy Vincent, lord mayor of London, eulogized Canadians when he gave the court of common council an account of his visit to Canada.

"I shook hands with thousands of people, received the freedom of cities and a great number of civic welcomes," he said. "Above all, I found an unbounded enthusiasm for all things British, a love of England, a depth of feeling for this old city and its representatives which was most unbelievable."

"Never during our whole visit was there one word of adverse criticism. I heard on all hands that our visit revived or re-established a new view of England in its civic life and had far-reaching results which will strengthen the ties of kinship."

"Canadians have in a few score years accomplished miracles. I returned filled with an impression of a vast canvas on which they have as yet, with all untiring energy and splendid craftsmanship, but sketched the outline of a great and beautiful picture."

Hungary Using Esperanto

Employees Of Post Offices Being Trained In Language

Postal officials are now training their employees in the international Esperanto. Through the Universal postal union of Berne, the Netherlands postal administration has sent out invitations to the third international course for postal, telegraph and telephone officials, for a ten-day course. Banks are also using Esperanto. The Hungarian-Italian bank and the Hungarian general credit bank are both using Esperanto in addition to the language previously in use for correspondence. The banks have now sent out folders giving maps and information as to the location of their branches in Budapest and the rest of the kingdom.

American Animal Clinic

Doctors Will Treat Any Injuries In Memorial Hospital

A clinical service for pets—which treats blind turtles and mends broken legs of canaries—is maintained in Boston by the Merwin Memorial free clinic for animals.

Made possible by a \$60,000 trust fund donated by animal lovers and admirers of Henry C. Merwin, who presided over the Boston workhorse association for more than 20 years, the clinic was founded in 1929 as a memorial to him.

Here pets of all sizes, descriptions and breeds are treated by Dr. Terrence Burke, chief veterinary, and his assistant, Peter Simpson.

Carry High Speed Cameras

Aircraft Being Built For Service In Northwest Territories

The second of three aircraft being built in Montreal for the department of national defence for service in the Northwest Territories has been put through tests. The planes are especially built for high speed photographic and transport work and carry sufficient fuel and oil for five and a half hours' work at high altitude.

At the rear of the cabins are mountings for three oblique cameras which photograph automatically through small apertures in the metal body. The aircraft are fitted with float landing gear and the normal wheel undercarriages can also be fitted as well as a special ski undercarriage for winter flying.

The Netherlands have a shortage of land and must find employment in industry for over 30,000 people this year.

Nearly every country in the world has, at one time or another, turned its post office system into an advertising agency.

Carrying War Orders

Army-Age Nazis Know Where To Report If Needed

Millions of Germans between the ages of 25 and 45 are carrying in their vest pockets an order telling them exactly when and where they must report in the event of war.

This "Kriegsbeorderung" (order to take part in war), as it is headed is causing admitted anxiety, especially among the older men who themselves experienced the horrors of the Great War.

Outwardly they display enthusiasm; but in private, confidential conversations their beliefs are often quite different.

With Prussian exactness the order specifies even the barracks in which the recipient is to report, what he is to bring with him in the way of clothing, what he is to do in case he meanwhile changes his residence, etc.

The order is a blue sheet of paper eight by five inches. Written crosswise on the face of it are the words: "This order serves in lieu of a ticket on the railways to the point where the addressee must report."

Regulations accompanying the order state that failure to live up to the terms of the Kriegsbeorderung will be punished by martial law.

"The person thus summoned is subject to martial law from the first day of its becoming effective."

Practice Has Been Stopped

Philippine Jail Prisoners Not Allowed To Eat At Home

Prisoners in the provincial jails of the Philippine Islands may no longer return to their homes, unescorted, to have their meals and to sleep.

Elpidio Quirino, secretary of the interior, has returned from a tour of the provinces and says that this "illegal and bad practice" must be discontinued forthwith.

The reason for allowing the prisoners to take their meals at home was that the government thus avoided the cost of feeding them.

In the past, minor offenders in many prisons were permitted to go home two or three times a day for their meals. Many of them were released every night so that they could sleep at home. Few tried to escape.

A Good Advertisement

Smith noticed a shilling on the floor of a big store. After glancing cautiously around to see that no one was looking he took out his handkerchief and dropped it on top of the coin. He then picked up the handkerchief, but the coin stuck firmly to the floor. He stood up hastily as he heard a shop assistant approached him.

Henceforth, in Montreal, anyone who blows an auto horn between midnight and four a.m. will be liable to a fine of \$40 and costs or one month in jail. This will be apt to take the enthusiasm out of the tooters.

Driver's Licenses

Vancouver Police Official Would Have Photo Of Holder In Air-Tight Case

A suggestion that future driver's licenses be issued in a transparent case bearing a picture of the holder was made to the Vancouver police and traffic committee by Superintendent of Detectives H. Darling of the Vancouver police department.

The cards would be sealed in an air-tight case containing a picture of the holder, and an identifying mark which would fade if the case was tampered with. This would preclude the possibility of persons transferring licenses, Darling said.

The stingless bees of Panama gather lubricating oil with their feet to mix with the wax for their honey-comb cells.

Palm warblers of Labrador winter in Louisiana, while those of north-western Canada spend their winters in the Greater Antilles.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER VI.—Continued

As their eyes met she had a premonition that she and this blonde representative of the aristocracy of old New York were fated to clash more than once. Thinly veiled antagonism clashed between them, almost a thing you could see, instead of merely feel, in its intensity. Starr sensed the trouble with Stephanie at once. The girl was jealous of Michael Fairbourne's attentions to "Play-Girl," and now that she had seen Starr, all Michael's protests that his interest was purely in his firm's behalf were under scrutiny by Stephanie, who was inclined to have thoughts of her own on the subject.

Starr's mocking smile deepened. Her supercilious pose was heightened. There was a hint of devilment in her voice as she answered:

"I am interested to meet you, too, Miss Dale. Hassan—oh, dear, will I never remember to say Michael!—has told me so much about you."

For a second naked venom burned in Stephanie's blue eyes. She flung at Michael in a brilliant voice:

"Better be careful to whom you speak of me, Mike, darling. I certainly don't want to be put between the covers of one of Starr Ellison's 'true confessions'!"

Starr caught her breath sharply, as though she had been slapped in the face. She closed her eyes, and on opening them, all at once she found herself alone. Stephanie had turned away unceremoniously. Someone had claimed Michael's attention for the moment. Starr looked around, bewildered.

A voice caught her ears. Stephanie's frosty voice. Deliberately loud, so that Starr could not help overhearing. Stephanie was saying to somebody:

"I think it's simply terrible that poor Mike has to be associated with a creature of her type, even though it's merely in a business way. His firm is handling her book, you know, and they've insisted on his attending to her publicity. . . . As if she needed any more! But Mike's so clever. . . . And of course he's expected to be nice to her on the firm's account, sort of act as a master of ceremonies, as it were. . . . But, my dear, it's perfectly galling when decent people have to pander to a common adventuress!"

CHAPTER VII.

Starr flushed to the very roots of her hair. So that was the story Michael had told Stephanie! Her red mouth set in a bitter straight line. She might have known. Though surely Michael owed a shred more gallantry than that to the girl who was helping him carry out his fantastic whim? No matter how little he knew of her—or cared to know. No matter what he imagined her previous life had been. He should have some little consideration for her. If his book made him rich enough to marry Stephanie Dale, she of the stiff-necked aristocracy, it would be partly because of the brief part played in his life by Starr Ellison.

Starr was jolted out of her temporary embarrassment, her moment of quick resentment, by a man's voice. At first she thought it was Michael. But the eyes looking down into hers were as black as her own, instead of gray. The face was leaner, and the hair incredibly sleek, where Michael's black hair had an arresting wave.

The man smiling at her said:

"I believe I'm the only man here who hasn't been introduced to you. I'm beginning to wonder if the oversight isn't deliberate."

Starr recognized him. True, she had not met him, but she remembered Michael saying:

"See that chap over there—dark-complexioned chap with the Menjou look? That's Lance Marlowe. If my book had been 'Play-Boy' instead of 'Play-Girl,' Lance is the very type I would have picked. He's tailor-made for the part. He's been a play-boy for twenty years—always will be, I guess."

"I don't suppose he ever found any good reason for being anything else, and it seems to have been wished on him. His father left him a fortune. He has a yacht, a string of polo ponies, all that sort of stuff, but so far as anybody knows he has never done an honest day's work in his life. Or any other kind. His favorite indoor sport is buying diamonds for his current light of love, and they come and go in quick procession. Also, and this is important in the

IN BED FOR WEEKS WITH BACKACHE

Quick Relief With Kruschen

It was advice from her mother that led this woman to take Kruschen Salts for her backache, and before she had finished the first bottle she was feeling better. This is the letter she writes:

"About this time last year I had severe pains in my back and was prostrate for three weeks. I could not even rise in bed. I tried several well-known remedies, but to no avail. Then I wrote to my mother telling her of my trouble. She wrote to me by return of post urging me to try Kruschen Salts. I immediately bought a bottle and I can truthfully say before I had taken the fifth dose I could sit up. I kept on taking them and in less than two weeks I was about again. I am never without Kruschen now."—(Mrs.) A.G.

Unless the kidneys function properly, certain acid wastes, instead of being expelled, are allowed to pollute the blood-stream and produce troublesome symptoms: backache, rheumatism, and excessive fatigue. Kruschen Salts is an excellent diuretic or kidney aperient, valuable in assisting the kidneys to excrete acid impurities.

eyes of a good many New Yorkers who still cling to such outmoded ideas as decency, as far as the honor and chastity of women are concerned he is probably the most dangerous man in New York!"

Starr felt a little tingle of excitement when the man whom Michael had so sketchily characterized spoke to her. It was a long moment before she answered his greeting. And then her reply was in keeping with the role she was playing.

She drawled, with a slow smile, as her long eyes lifted to him lazily:

"Perhaps Michael believes in saving the best for the last."

Lance suggested: "Or perhaps he is not unaware that a friendship unconventionally begun is always all the more thrilling."

Starr laughed, and Lance hurried on, his black eyes burning down at her: "Now that we have met, am I not going to have the opportunity for you to tell me all about yourself?"

Starr's eyes dropped demurely, then she lifted them—for the scantiest fraction of a second to say:

"There's nothing left to tell about me—that everybody doesn't already know. . . . I might begin at the beginning, though, and tell you I'm free, white, and twenty-one, and—"

"Adorable!" whispered Lance, his voice husky. "Will you dance with me?"

Starr held up her arms and they glided into a dance. He was pleasant to dance with, lithe and graceful, and when the music slid from a waltz into the haunting throb of a rumba, with the waves of the Spanish music holding in its depths the suggestion of the emotional pleading of love in a setting of moonlit balconies and patios inside rosy walls, slow-eyed señoritas with mantillas, Starr's steps fitted perfectly into Lance's skilled footwork. Her own perfection was the result of Michael's teaching.

Lance's sleek black head bent closely over hers.

"How has such a girl as you ever managed so long to remain incognito? If you've been anywhere I've been, you've certainly been hiding behind dark glasses."

"Sometimes I wear a long gray beard," Starr murmured.

"And now?"

"Oh, the usual answer," Starr whispered lightly. "It was shown to me plainly how greatly it would be to my advantage to take off my mask. Money, dear man. . . . My appetite for bakshish is insatiable. I assure you."

Lance laughed softly. "Money! What a conversation for such a glorious dancer! And here I am trying to think of enough words to try to tell you how gorgeous you are—you, with your Cleopatra eyes, and—" his head bent lower as he whispered—"your adorable red lips that nobody knows better than you were made for a hundred kisses. . . ."

Starr drew back from him a little and looked up into his eyes. Her whisper seemed shocked.

"Only a hundred?" she asked.

"And I had thought—"

"Just the appetizer, my dear," Lance laughed. "There would be a full menu ahead."

Starr studied the man as they danced. His face was not unpleasant. He had a full, rather sensuous mouth, and the bright, roving eyes of a restless pleasure seeker. At such close range she could not see the tiny lines of dissipation marring his well-shap-

REMOVE NASTY PIMPLES

Each night rub Mecca gently into the affected parts. The dual action of Mecca will bring out the poison and at the same time the skin tissues will absorb the healing, nutritive properties of Mecca. 35¢, 50¢, \$1.00.

"MECCA" OINTMENT

ed features, yet even so he looked younger than his years.

She wondered how she was doing with her verbal fencing with him. Was she saying what might be expected of her? The most dangerous man in New York! Well, it was an apt meeting. Did she not bear the reputation of being the most dangerous woman? Play-Boy and—Play-Girl!

They talked a great deal as they danced, and it was a relief to bandy light chatter with someone who skimmed over the surface of life. The tilt with Stephanie; the long hours during which she was being coached for her part by Michael; the near, dizzy attraction of Michael—all had combined to stir emotions deeper than Starr Ellison had any right to feel. She must not let herself feel too deeply about anything. Her time was too short, and feelings could be so poignant.

Lance Marlowe was exactly the right antidote for her. He was incapable of feeling deeply. Of that Starr was instinctively certain. The world for him was not what it was to most. It was his playground. That was the way it must be for her. It had all been settled. For Starr Ellison the world must be her playground—for her brief six months!

It came to Starr all at once that Lance Marlowe was one man who could show her how to crowd a lifetime of thrills and excitement into every single day, if she would let him.

He was saying, as they swept down the long glittering floor of the ballroom:

"I still can't see, all joking aside, why you've remained anonymous so long. Were you afraid? No—" he shook his head—"Now that I've seen you I can't believe that's the reason. It must have been out of consideration for your less fortunate sisters whose pale beauty is dimmed by your Egyptian princess brilliance, Starr. There's no need for all that Egyptian ballyhoo in my case. I'd have known it for the truth no matter where I saw you, nor under what circumstances." He laughed, with a little of understanding exultation in his voice. "But how you're going to make them all suffer now!"

It was a charming thing for a man to say, but Starr thought the words passed his lips just a little too glibly. She shot him an amused glance from beneath her long, silken lashes.

"I suppose that's your usual line for every new woman you meet?"

(To Be Continued)

Many Treasures Received

Rare Things Sent To U.S. Mint To Be Melted Down

A huge oblong box was received at Washington by Mrs. Nellie Tayloe Ross, director of the U.S. mint.

Out of the grim box came huge, heavy, shiny silver coffin handles, elaborately decorated. They were nearly six feet long.

The former woman Governor of Wyoming said:

"We've had nearly everything that contains gold and silver turned in, but this is the first time we have ever had coffin handles sent in to be, shall we say, liquidated?"

Mrs. Ross said that since the Administration had started paying \$35 an ounce for gold, and around 45 cents an ounce for scrap silver, treasures of the world had been sent to the mint to be melted down into bullion. Sighing, she said:

"It seems a tragedy. We have had rare trophies made by some of the greatest goldsmiths and silversmiths in the world sent in to be melted down."

"They include gifts of kings and queens, medals for bravery, wedding presents. Oriental gold cloth, millions of souvenir spoons, bracelets, necklaces, ancient watches and ancient coins."

"We have to have an affidavit of ownership before we can buy these articles. In that way we find interesting histories that connect personalities of the world."

"There was the case of the once great opera star, given a great treasure by Queen Victoria. He was old, his fame had faded and he needed money. He turned in the trophy for cash."

Mrs. Ross explained that employees of the mint were unable to purchase the treasures and had to melt them down.

How Gasoline Is Wasted

A large amount of gasoline is wasted by the average driver. Sources of waste include improper carburetor adjustment, unnecessary idling or racing, high-speed travel, neglect of lubrication, leaking piston rings, sticking valves, soft tires, and many others.

The Sahara Desert has added 136 miles of once fertile African land to its sandy wastes in the past three centuries.

Make Good Mechanics

Eskimos Have Considerable Aptitude States Bishop Of Arctic

Telling of an Eskimo convicted of murder and serving five years at the R.C.M.P. barracks, Aklavik, who is "perfectly harmless," looks after the inspector's child when his wife is busy, and is declared by her to be "the best nurse I could get anywhere," Rt. Rev. Dr. Archibald L. Fleming, Anglican bishop of the Arctic, related a number of incidents and observations of his recent tour of his huge diocese, one-third the entire land area of Canada.

The bishop, whose domain comprises 2,250,000 square miles, land and water, travelled 4,579 miles by air, 4,000 by railway and 900 by water, averaging 100 miles a day despite 16 days' delay at Herschel Island, and visited every mission except Bathurst Inland and Cambridge, where the ice and snow were impossible to penetrate.

While Indians make better carpenters, the Eskimo have considerable mechanical aptitude, said the bishop, telling of losing the second-hand of his watch and having it replaced by Taylor Pokiak, an Eskimo at Tuktoyaktuk, after every white man he had asked to repair it had had to confess inability, and of having his camera repaired by John Kaogak of Herschel Island. Another time he travelled in a motor boat belonging to an Eskimo who, when a cylinder-head had cracked, had repaired it with a strip of canvas and some wire, "and it worked fine."

Natives are now being trained as carpenters, and the new school for 100 children at Aklavik, now the largest building in the empire north of the Arctic Circle, has been built entirely by natives under a master carpenter, Thomas Summers, of Toronto. The new school, which is 130 by 75 feet, has 12 teachers, and the principal is Rev. H. Sherman Sheppard, of Halifax.

The new hospital at Aklavik, replacing the one burned down in April, is well under way, the bishop said, and when completed will have 48 beds, so arranged that normally only 24 will be available, the other 24 being cut off to save fuel. Modern operating tables and equipment are being installed, and it is hoped that contributions will make possible up-to-date X-ray equipment by the opening.

Biggest News Figure

King Edward Voted Most Outstanding Headliner In World

A group of publicity men, movie scenario writers (male) and newspaper reporters assigned to Hollywood were gathered around the luncheon table when the talk veered to just who would be termed the outstanding single popularity headliner in the world.

They meant, what one person had most publicity value in the attention if, for instance, he went to Hollywood at the same time as other outstanding persons arrived there.

The unanimous opinion of the hardened press agents and reporters—all of them accustomed to see glamour and headlines spilled all over the place—was that King Edward of England at present represents the world's greatest current personality prestige.

No Necessity For War

Speaker Takes Optimistic View Of European Situation

European war is not necessarily inevitable as a solution for present problems, said Dr. Hans Simons, member of the graduate faculty of the New School of Social Research, New York, addressing the Canadian Club at luncheon at London, Ont. Dr. Simons was a former member of the German reich and the Prussian ministry of the interior.

The speaker said he preferred to retain an optimistic view of the European situation. He believed a balance of influences, political and economic, would enable Europe to reach a peaceful solution of her problem.

Knows How It Feels

Dr. Herman D. Richman, dentist, of Albany, New York, awoke during the night with a toothache, walked the floor just like other people do and finally went to his office. There he administered an anaesthetic to his lower jaw before a mirror, waited until the pain-killer took effect, and then applied the forceps. Out came the aching wisdom tooth and he went back home to bed.

Seal Themselves Up

There are many old Buddhist monks in Tibet who have kept themselves sealed up in little huts since early youth. Many of them have been enclosed more than 40 years in the huts, which contain only openings for food.

THE Household Baker

Mildred Mac McKenzie, supervisor of the Ogilvie Flour Mills Institute of Household Science, will send free information on cooking, baking and housekeeping.

ing problems, upon receipt of coupon from a bag of ROYAL HOUSEHOLD FLOUR. Address Mildred Mac McKenzie, care of The Ogilvie Flour Mills Co. Ltd., Winnipeg, Man.

Ogilvie ROYAL HOUSEHOLD FLOUR is triple-tested to help ensure your success in baking—tested for wheat quality before milling, for flour quality during milling and for baking quality after milling—all before you buy. Whether for bread, cakes or pastry, its uniformity and absolute dependability will simplify your baking to an amazing degree.

Get a bag today and Try this tested recipe with Triple-tested Flour

CHELSEA BUNS (Quick Method)

Temperature: 400°F.-375°F. Time: 30 minutes

1 cup milk; 2 tablespoons sugar; 1 teaspoon salt; ½ cake fresh yeast; 2 tablespoons lukewarm water; 3 cups ROYAL HOUSEHOLD FLOUR; ¼ cup sugar; 3 tablespoons butter.

Filling: 2 tablespoons softened butter; ¼ cup Sultanina raisins; ¼ cup brown sugar; ½ teaspoon cinnamon.

METHOD: Scald milk, add 2 tablespoons sugar and salt; cool to lukewarm. Dissolve yeast in lukewarm water and add to milk mixture; add 1 cup flour. Beat until smooth. Let rise in a warm place until foamy. Add remaining sugar, flour and butter. Turn on floured board and knead until smooth and elastic. Place in greased bowl; let rise until light. Punch down to release gas bubbles. Knead lightly and roll ¼ inch thick. Spread with filling; roll as for jelly roll. Cut with sharp knife or scissors, into one inch slices. Place close together on greased baking sheet. When light, bake in moderately hot oven. Entire time for making these buns is approximately 4 hours.

OGILVIE ROYAL HOUSEHOLD TRIPLE-TESTED FLOUR

Little Helps For This Week

All the paths of the Lord are mercy and truth to such as keep His covenant and testimonies. Psalm 25: 10.

Speak Lord, for Thy servant heareth,
Speak peace to my anxious soul,
And help me to feel that all my ways
Are under Thy wise control;
That He who cares for the lily,
And feeds the sparrow's fall,
Shall tenderly lead His loving child;
For He made and loveth all.

It is not by seeking more fertile regions where toll is lighter and circumstances free from difficult complications, but by bringing the high courage of a devout soul, clear in principle and aim to bear what is given to us, that we brighten our inward life and introduce the kingdom of heaven into the midst of our earthly day. If we cannot work out the will of God where he has placed us, then why has He placed us there?

Makes Business Pay

Japanese Woman In California Proves She Has Ability

Yoshimitsu Sonobonmatsu, born in Japan, married to a Japanese in California via the picture-card route, has found her spot in the American business world. When her husband, proprietor of the Hotville Packing Co., died in 1931, she took over the heavily indebted business and has satisfied the superior court she can keep it running on a paying basis and pay off all claims.

Jethro Wood, the man who invented the modern plow, whittled his first models out of potatoes.

IN UP-TO-DATE STABLES

—Old Reliable Minard's

When horses come in to stable with wire-cuts or saddle boils, or cows have caked udder, the thing to do is get the Minard's bottle at once, as Mr. Dowd of Glenboro, Manitoba, knows. He writes:

"I like your Minard's Liniment. Like to have it in the house. I have found your Minard's Liniment especially good for barbed wire cuts on horses."

A family doctor prepared Minard's Liniment over 50 years ago. Still invaluable in every stable and every house.

CO-OPERATION

In every business organization to-
day, particularly in the smaller cen-
tres, the merchants suffer consider-
able loss of co-operation; probably it
is due to the fact that citizens do not
give enough thought to their neighbor
merchants, who have in many cases
invested heavily for the convenience
of the local trade.

To build up a prosperous commu-
nity, there is only one course to take,
and that is to get together, spend and
work together, buy from the local
merchants whenever possible, take
him into your confidence. Any one of
them will be only too pleased to as-
sist you and save you money on any
particular line of merchandise.

Citizens cannot overlook the fact that
a prosperous community naturally
makes conditions better for the in-
dividual, making local property a bet-
ter asset, affording a much better out-
look on life.

Three-Man Game Commission

Announcement comes from Ottawa
that following consultations between
Hon. Gordon Sloan, attorney-general
of B.C., and Hon. J. E. Michaud,
federal minister of fisheries, a three-
man commission to investigate B. C.
sport fishing has been set up. The com-
mission will investigate changes de-
signed to prevent overlapping juris-
diction.

Loose Spare Tire and Wheel

While M. M. Peterson, Aldergrove,
was driving his truck on the Pacific
Highway through the Green Timbers
last week, his spare wheel and tire
fell off. He stopped and was back-
ing up to recover his property when
a car going in the other direction
stopped, picked up the wheel and tire,
and made off.

It's "Cold-Catching" Time!

Without being unduly pessimistic, we advise you that
the "danger season" is here—coughs, colds and chills
are easily caught and hard to get rid of in damp, raw,
wintry days. Be Prepared! We handle a full line of
Cough and Cold preventatives and remedies.

CANADA LAGS IN FISH CONSUMPTION

Compared to the people of England,
Canadians are poor fish eaters. In the
opinion of Alfred H. Brittain, head of
one of Canada's largest fish produc-
ing companies and former president
of the Canadian Fisheries Association.
Over in the Old Country the consump-
tion of fish amounts to about 43 lbs.
per capita. Here in the Dominion it
is only about 21 pounds per capita.
Yet, according to reports presented to
the fishing industry, Canadian fish is
noted the world over for its flavor
and quality.

Mr. Brittain has continuously advo-
cated an educational and advertising
campaign by the government to help
increase markets within the Dominion
for Canadian fish. If the national
consumption were to be increased by
only ten pounds per capita it would
mean approximately another 100,000-
000 pounds of fish.

With the present crusade for the
increased consumption of fish now ap-
pearing in the newspapers and maga-
zines of the Dominion, that goal seems
to be drawing nearer. Such increase
would add materially to the general
welfare; it would benefit the trans-
portation companies and affiliated in-
dustries; it would increase the revenue
of the primary producers, and it
would provide a real stimulus for the
entire fishing industry.

Tenders!

TENDERS are hereby invited up
to October 31st, 1936, for installation
of complete oil-burning equipment in
the new high school auditorium.

THE COUNTRY WEEKLY

That weekly community newspapers
throughout Canada are performing an
important function is so well known
that it scarcely need be repeated here.
The best of these country weeklies are
giving such a fine service in local
news that they are being closely read
by the people of the community—and
this is a service that large metropol-
itan newspapers cannot possibly give
in these localities. This judgement is
backed by no less an authority than
Alfred P. Sloan, president of General
Motors, who recently made the state-
ment that the community weekly was
the most thoroughly read consumer's
newspaper in the United States.

One Canadian weekly reports that a
large Canadian food corporation also
paid a nice compliment to the town
weekly newspapers when it recently
said that its company had come to
the conclusion that the small com-
munity paper offered a most effective
advertising medium from the stand-
point of the country district consum-
er. It declared that a recent adver-
tising campaign conducted in these
newspapers had proved this fact as
the resulting sales per capita were
much greater than those obtained
from similar campaigns in daily news-
papers in larger centres. The cost,
too, was much less in the weeklies.

The main factor in holding sub-
scribers and advertisers is reader in-
terest, and it is the country weeklies

HEALTH INSURANCE FORMS

NOW BEING CIRCULATED

Employers of labor in the district
have this week received from the
government registration forms for em-
ployees coming under the British
Columbia Health Insurance system.

There are about two dozen ques-
tions on the form respecting employ-
ees, their families and their earnings.
Those eligible for the health insurance
are employees with an income of less
than \$150 per month.

It is estimated that more than 100-
000 persons will fill in the registration
forms.

say about the —
QUAKER
Easy method
of Baking

"NO MORE KNEADING AND
OVERNIGHT SETTING FOR ME,"
says MRS. F. J. SMITH, MILNER, B.C.

"Quaker Flour and the Quaker Easy
Method of Baking not only save me all
this trouble and time, but my results are
much better and I never have a failure."

MRS. Smith's remarks are typical of
the feelings of Western Canada's
finest cooks... that's why the popu-
larity of Quaker Flour and the Quaker
Method of Easy Baking has spread like
wildfire and is gaining new friends
every day.

Just think! No kneading... no
sponge to set overnight... better
results every time. You'll be amazed
at the saving in time and effort that
Quaker Flour and the Quaker Easy
Method gives you. Order some Quaker
Flour today... it's better for cakes and
pastry, as well as for bread.

Send for FREE Booklet describing the
Quaker Easy Method of bread baking.

Synopsis of Land Act
PRE-EMPTIONS
VACANT, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation and improvement.
Full information concerning pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C.; Bureau of Provincial Information, Victoria, or any Government Agent.
Records will be granted covering only land suitable for agricultural purposes within reasonable distance of road, school and marketing facilities and which is not timberland, i.e., carrying over 5,000 board feet per acre east of the Coast Range and 8,000 feet per acre west of that Range.
Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division in which the land applied for is situated, on printed forms obtained from the Commissioner.
Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.
Pre-emption carrying part time conditions of occupation are also granted.
PURCHASE OR LEASE
Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes. Minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land, \$2.50 per acre. Further information is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."
As a partial relief measure, reverted lands may be acquired by purchase in ten equal instalments, with the first payment suspended for two years, provided taxes are paid when due and improvements are made during the first two years of not less than 10% of the appraised value.
Mill, factory or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.
Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads, conditional upon a dwelling being erected in the first year, the lessee being required to reside and improvement conditions are fulfilled and land has been surveyed.
For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.
Under the Grazing Act the Province is divided into grazing districts and the range administered under grazing regulations amended from time to time to meet varying conditions. Annual grazing permits are issued based on certain monthly rates per head of stock. Priority in grazing privileges is given to resident stock owners.
Stock-owners may form associations for range management. Free or partially free permits available for settlers, campers and travellers, up to ten head.

ABBOTSFORD

Mr. Fry is having a double garage erected on his property on Oscar street.

Mr. R. DesMazes and daughter Madeline made an auto trip to Kamloops this week.

The Abbotsford Bakery has purchased the old post office building and also 44 feet on the rear of the lot.

James Young of Swift Current, Saskatchewan, has rented the former D. McDonald place on the Ware road.

Miss Beth Andrews of Vancouver was the guest of her parents, Mr. and Mrs. H. S. Andrews over the week-end.

The badminton club dance held in the Orange hall last Wednesday evening was a very enjoyable affair, and was well attended.

Dr. J. A. Bryant has purchased a colonic irrigator and a spectro-chromolam, which are being installed in his Abbotsford office this week.

Mrs. William Page and son Albert, Leamington, Ont., who have been recent guests of Mr. and Mrs. E. A. Hunt, returned home last Thursday.

Mr. and Mrs. D. Willan had as their guests over the week-end Mr. and Mrs. H. K. Hall, their son David, and Mr. and Mrs. J. A. Grantham of Vancouver.

Over 100 interested people from all over the district attended the demonstration of "Flex-Tred" tractors at the farm of W. S. Hill-Tout on Saturday afternoon.

Miss Frances Benedict, R.N., is home on a brief vacation before taking over her duties as supervisor of the 1936 class in training at St. Paul's hospital, Vancouver.

Roy Gamble and family arrived in Abbotsford last Thursday from Khe-dive, Saskatchewan, with a car of implements and household effects. Mr. Gamble has rented 40 acres in the Peardonville district.

Cyril White appeared before Magistrate Pratt Monday morning, charged under section 53 of the vehicle act, with driving to the common danger. Magistrate Pratt gave the accused a severe lecture, pointing out how fortunate the occupants of the car were to have escaped from serious injury or death. White was fined \$10.00 and costs of \$2.50. Damage to the car, which left the McCallum road and rolled into the gully, is estimated at \$100.00.

Constable Hayes of the B.C. Police has been transferred from Burnaby to Abbotsford. He has leased the residence of Miss H. Thompson, next to the Conway farm.

THAT HALL QUESTION

Editor News:

The local Orange hall was crowded to capacity on Thursday evening last, and hundreds, yes hundreds, of farmers were turned away owing to lack of space. This is just another indication of the need of a larger hall in Abbotsford for public meetings, etc.

We have lost the F.V.M.P.A. annual convention, which brought lots of business into Abbotsford, through not having a large enough hall; the Canadian Legion Masquerade has had to be held away from here, and dozens of other events, all meaning a lot to Abbotsford, have been held elsewhere.

Isn't it about time something was done about it? Shouldn't we find out just how much the auditorium is going to be available to the community, or shouldn't we get busy and erect a community hall large enough to once again make Abbotsford the meeting-place of the Valley?

INTERESTED

DEAN F. CLEMENT

Head of the faculty of agriculture at the University of British Columbia, who has direction of the first group of B.C. Electric farm radio talks on "Great Britain and Her Farms" which commence Monday evening, November 2, at 8.30, over CRCV Vancouver, and CHWK, Chilliwack.

WILSON—GILLIES

The marriage took place in Bellingham of Flora, youngest daughter of Mr. and Mrs. K. Gillies of Clayburn, to Clarence Wilson, eldest son of Mrs. Wilson of Langley Prairie. The young couple will make their home at Seymour Narrows.

B.C. ELECTRIC FARM RADIO TALKS RESUMED

Of interest to Fraser Valley residents is the announcement of a new series of farm radio talks sponsored by the agricultural division of the B.C. Electric Railway Co., in conjunction with the department of extension, University of British Columbia. The talks, which commence November 2, will be broadcast each Monday evening at 8.30 over stations CHWK, Chilliwack and CRCV, Vancouver.

The five November talks will concern "Great Britain and Her Farms" with attention being devoted to Canadian problems in the light of British agricultural experience.
Dean F. M. Clement, who spent the past summer in Great Britain, where he made a study of British agriculture and its problems, will direct the lectures in collaboration with Professor H. M. King, Dr. Blythe Eagles and Professor Robert England. The first talk in this series on Monday, November 2, is entitled "What British Agriculture Looks Like," and the study concludes November 30 when the speakers ask the important question "What Next for British Columbia and Canada?"

A new feature of the farm talks this year will be a school of the air, in which letter contests will be conducted and special prizes awarded.
Complete information is supplied in an illustrated syllabus prepared by the agricultural division, B.C. Electric Railway Company, which will be mailed free to those requesting.

BRADNER

J. Roche is visiting with his parents for a time.

Ernie Bell of Harrison Lake was the week-end guest of his parents.

Before leaving for a visit to Ontario, Mrs. G. McDermid spent a few days with Mrs. W. Winchester.

Mrs. Smith and family have arrived from Alberta and have taken up residence on the farm recently purchased from Mr. G. McDermid.

Under the auspices of the P.T.A. a successful whist drive and dance was held in the community hall last week. First prizes were won by Mrs. McMahon and Leonard Dumont, and consolations by Miss E. Owen and O. Viedman.

"A BETTER CHEW-
I'LL TELL
THE
WORLD!"

BIG BEN

The PERFECT Chewing Tobacco

Education And The Teacher

Few people look upon periods of depression such as Western Canada has experienced in the past few years, along with most of the other countries of the world in varying degree, with complacency. On the contrary here, as elsewhere, such experiences are usually regarded by the great majority as periods of unadulterated evil, with dissatisfaction and unrest their inevitable concomitants.

It is customary, under such conditions, to surround everything with a halo of gloom. Everything is wrong at home and abroad. Words and deeds are subjected to criticism in an intensive search for microscopic flaws and motives are probed with deep, underlying suspicion. Altruism and faith in fellow mankind almost appear to have gone into hibernation and the whole stream of life seems to be ruffled with turbidity. Criticism is the order of the day.

Criticism of the right type and with the proper motive behind it has, of course, its place in the scheme of things. In fact, without it, there could be little if any progress, but if it is to fill its appointed role in life, it must have behind it a sincere desire to promote betterment and must be dictated by reason rather than swayed by blind passion.

The educational systems and educational methods in operation in the prairie provinces are among the many things which have had to run the gamut of the critical vogue of the period. The criticism which has, in recent years, been voiced freely at conventions, school board sessions, public meetings and during election campaigns in the home and on the street comes not only from parents of children attending educational institutions and the general public but also from educational authorities, teachers and others trained in the craft of pedagogy.

One hears, on the one hand, that the educational system is too expensive and too extravagant. On the other hand, governments and trustees are accused of parsimony. One day the people are told that, in effect, the educational system and set-up is lagging behind the times and the following day, that it is too far advanced for the requirements of present day social conditions and requirements.

As to methods, curricula, equipment and text books, criticisms are legion and varied, so much so, in fact, that it would take a ponderous tome to even list them.

While it may be very difficult, and perhaps impossible to crystallize all these opinions and criticisms into some co-ordinate form which might enable them to be attacked and dealt with on a scientific basis, the existence of so much discussion on such an important topic demonstrates, at least, that the depression is having the beneficial effect of arousing a keener interest in a topic of vital interest to the future welfare of the country, because it cannot be denied that the trend of education of the youth of today will largely determine the destiny of the nation tomorrow.

Because of this it is highly important that there should be some unification of majority opinion on educational systems, methods and trends.

There are one or two things which should not be lost sight of in this welter of discussion which often, unfortunately, ranges around comparatively trivial details. That is, the main purposes of educational systems, which might briefly be enunciated as the intention of developing a desirable type of citizen and of developing a citizen capable of fitting himself or herself into the life of the community.

This means the development of a race of people with character and ability to think and act for themselves. If this is borne in mind as the chief objective of education, the great importance of the character and ability of the teacher becomes immediately apparent, a matter of far greater importance than the method, the text book or the curriculum, of even greater importance than the type of building in which instruction is carried on or the equipment that is used in imparting information.

The statement is not made with any intention of conveying an impression that the schools of the west are not staffed with teachers of character and capacity. On the contrary, the standard of the teaching profession has improved very materially and rapidly for so young a country as the Canadian west and teachers of the present day generally represent a high standard.

But it should be pointed out that if more emphasis is laid on the character and ability of the teacher as an essential of the first importance, the controversies over many other phases of the educational system would assume their rightful comparative values and would be relegated to the rear as questions of more or less minor consequence.

Beans Will Be Specialty

One of the reasons King Edward VIII. has chosen Rene Legros as his new cook is because the chef knows how to make Boston baked beans. His Majesty's palate will be tempted with specialties and food delicacies from every nation when Legros is installed in the kitchen at Buckingham Palace, but the beans will be his specialty.

The home economics page has a recipe whereby rhubarb can be kept indefinitely. That's a good idea; keeping it indefinitely.

Not until the allied armies overthrew Napoleon did champagne become widely known.

Kitsilano Boys' Band

The Kitsilano Boys' Band from Vancouver, conducted by Delamont, won the junior "A" shield in the band contest at Crystal Palace. The British Empire championship, in which 23 bands took part, was won by the Foden motorworks band.

Getting letters from friends is pleasant, but there's a dark side, as usual. You have to write them, too, or they quit.

Australian government railways are trying out an air conditioning system.

England has some 8,000 parish councils.

Replicas Of Crown Jewels

Collection Represents Forty Years' Hobby Of One Man

There will shortly be on view in London a collection of about 2,000 full-scale replicas of Crown jewels, regalia, insignia, and other emblems of royal ceremonial which have cost their owner nearly £30,000.

The collection covers most of the past and present monarchies of Europe, and represents the 40 years' hobby of one man and endless patient work by jewellers, stone-cutters, polishers, and other highly skilled craftsmen. Naturally the British Crown jewels hold pride of place. They go back to the crown of Alfred the Great (circa 871) and embrace the crowns, sceptres, and orbs of 36 Kings and Queens since that time. Every example is as near a perfect reflection of its original as is possible, except, of course, the diamonds, rubies, pearls, and other precious stones, which are represented by brilliants and synthetic stones.

Each is an absolute copy for size, shape, cutting and setting, color and polish, and so meticulous has been the effort to achieve historical accuracy that the owner of this collection has literally spent months in the Tower and the London museums making sketches and in collecting photographs and measurements.

In olden days each King and Queen had a new set of Coronation jewels. Most of these were destroyed in the Commonwealth days, and in more modern times economy calls have resulted in crowns being altered to suit successive monarchs.

Search For Gold In England

King Of Dowzers Arrives In London From Vienna

Armed with a small silver divining rod, and clad in a picturesque uniform, Dr. Emerich Herzog, "King of Dowzers," arrived in London from Vienna of search for gold and oil in England.

Interested parties, he says, have invited him to take part in the hunt for oil in the south. During his stay he will undertake a lecture tour, his engagements including an address to the British Society of Dowzers.

Drawing his rod from an inside pocket of his coat, Dr. Herzog gave a demonstration. Held over a cup of water the rod pointed its sprung tip downward.

This rod is not his only apparatus. He has with him 27 different types of dowzing machines for divining the presence of different mineral deposits.

Dr. Herzog, 76, has 49 years' experience of dowzing. He claims the discovery of important deposits of copper, gold, beryllium and platinum in Austria and himself owns gold, silver and lead mines revealed by his own rod.

Dr. Herzog came over to England by air and says that while the aeroplane was travelling between the coast and Croydon he recorded oil and gold deposits.

SELECTED RECIPES

SAND TARTS

- 1/2 cup butter
- 1 cup sugar
- 1 egg
- 1 1/4 cups flour
- 2 teaspoons Magic Baking Powder
- White of one egg
- 1 tablespoon sugar
- 1/4 teaspoon cinnamon
- Blanched almonds

Cream butter, add sugar gradually and well beaten egg, then flour which has been sifted with baking powder, "chill" dough. Put half the mixture on floured board and roll one-eighth inch thick—cut with doughnut cutter—brush over with white of egg and sprinkle with sugar and cinnamon which have been mixed together—split almonds and arrange on top, three halves at equal distance. Place on buttered sheet, bake 8 to 10 minutes in a slow oven. When baked the tarts should be a very delicate brown.

Disliked Travel By Air

Racing Greyhound Leaped 2,000 Feet To Its Death

After biting its way through the fabric of an airplane during a trip from Brisbane to Sydney a racing greyhound leaped 2,000 feet to its death. The dog had been placed in a wicker crate in the baggage compartment at the rear of the passengers' cabin, and apparently became excited at air travel. It escaped from the crate and then started the task of tearing its way through the fabric. It eventually succeeded for when the air liner arrived at the Sydney airport, the greyhound was missing and the fabric was torn.

Marie Antoinette was imprisoned for more than a year before her execution.

Japan Buys Canadian Ship

Merchant Marine Freighter Has Been Sold Five Times

Apparently under permanent ownership at last, the former Canadian government merchant marine freighter, Canadian Leader, sailed from Halifax with a Japanese crew for the West Indies to pick up a cargo of scrap iron consigned to Japan.

Since her sale along with nine other government steamships last winter to the Montreal-Australia-New Zealand line, the Canadian Leader has had a checkered career. She was sold by the Anzac line to the British Tower Steamship Company, resold to Rethymnis and Kulkundis, Greek shipping company, and finally bought by Japanese interests at a price reputed to be \$82,500. It was also reported Japanese interests had bought the Canadian Victor, now in England, and the Canadian British at Montreal.

Revising Their Manners

Japs Studying Proper Greeting For Next Olympic Visitors

Foreigners who attend the Olympic games at Tokyo in 1940 will be spared the embarrassment of the naive Japanese salutation, "How old are you?"

Police are passing the word around that the heretofore proper greeting—from the Japanese viewpoint—is distasteful to foreigners, especially women.

Although the Olympiad is three and a half years ahead, Japanese are already getting ready. Study of English has been given a great impetus among store clerks, policemen and businessmen. Early concern for the morals of Japanese girls is being dissipated.

It is said that it is possible to make a razor blade that would keep its edge indefinitely without stropping, but such a blade would cost approximately \$25.

Learned At Seventy-Two

Two years ago Mrs. Susannah Wheelwright of Norton-Close, Enfield highway, England, decided she'd better learn to swim. After all, she was only 72. So she went to the Enfield Lido, bought a season ticket, and took her first dip. Now she can swim a quarter of a mile.

To Help You AVOID MANY COLDS

At the first nasal irritation or sniffle, apply Vicks Vapo-Rol—just a few drops up each nostril. Used in time, it helps prevent many colds entirely.

VICKS VA-TRO-NOL

For Coronation Day

State Coach Of Speaker Of The House Being Reconditioned

The state coach of the speaker of the House of Commons is being refurbished up for the coronation.

Its last appearance was at King George's jubilee, when the speaker rode in it to St. Paul's. At King George's coronation in 1911 it merely conveyed the speaker from the House of Commons to the abbey, a distance of less than 300 yards.

Oddly enough while the coach, with harness and stabling, is provided by the state, the speaker has to arrange himself for horses. For nearly a century Whitebread's brewery has had this privilege, which dates from the time when Mr. Speaker Shaw-Lefevre married a Whitebread. The coach weighs nearly 3 1/2 tons, and having no brakes cannot go down hill.

Breathes With Iron Lung

Birdsall Sweet, now 18, has completed the fifth year he has spent with an "iron lung" to aid his breathing. Hospital attendants in Beacon, N.Y., described his spirits as good and his growth in height and weight nearly normal. His treatment began after an attack of infantile paralysis.

"I hear you're going to be married, old man! I hope you'll be very happy."

"Well, I don't see why I should not. I came through the War all right."

Our sins will find us out, but they can generally be relied upon to call again.

The distance around the world at the equator has shrunk 1 1/2 miles in the last century.

Show Their Patriotism

Thousands Of Families Change Swedish Surnames To Finnish

Thirty thousand families have officially changed their Swedish surnames to more Finnish-sounding ones. This wave of patriotism follows the example of 25,000 families who did the same at the recent Kalevala (national epic) centenary celebrations. Considerable confusion has resulted from this sudden change, states a message from Helsingfors. Postmen, particularly, are finding it a problem to deliver letters to the right people, and correspondents have to think twice when they address business and personal friends.

A Brand New Industry

Calling Elk For Photographers Is Job Of Banff Guide

Banff has a brand new industry which was invented by Les Saunders, of Bowden, north of Calgary, who is a trail guide there in the summer. On long pony trail trips he amused guests at the Banff Springs Hotel by imitating the peculiar mating call of the elk. It was not long until he found bull elk answering him, and finally approaching near to investigate. Now he is kept busy calling elk from the woods for enthusiastic photographers.

Smith had called on his tailor with a complaint. "Isn't this bill rather steep?" he said.

"You should know best, sir," said the tailor, "for it was run up by you."

More persons over 60 years of age live in Switzerland than in any other country in the world.

**NEW
PLUG-IN**

**NEW
JACKET**

YOUR NEXT 'B' BATTERY

ALWAYS A LEADER in battery improvements, Eveready this year presents the Layerbilt with a new "plug-in" socket. With each Layerbilt comes an adapter—a flat disc with connectors and pins. Simply attach the wires from the set to the is firmly embedded in the top of the battery. This "plug-in" is an extra advantage for the famous Layerbilt—the only battery built in layers—the modern invention which gives 40% more power than round-cell types. Pay a few more cents for Layerbilt—and have many hours more of trouble-free service. During the life-time of your set, Layerbilt will save you many dollars.

Freight Revenues Of Canadian Railways Reduced By Truck Competition

Gross freight revenues of the Canadian railways have been reduced \$38,000,000 a year by competition of trucks operating on the highways, and the damage to the net position of the railways is approximately \$34,000,000 per year. These figures were placed before the maritime board of trade at its annual meeting at Charlottetown in an address by S. W. Fairweather, director of bureau of economics, Canadian National Railways.

The railways, he said, were regulated in the public interest both as to rates and services, and had to provide for equalization of rates to markets over wide areas, the development of new territories, the encouragement of basic industries by freight rates lower than commercially justifiable and the maintenance of regular services, even in cases where there was no profit in doing so.

The general principle in effect was that the railway must take the rough with the smooth, and if it cost millions of dollars to keep a railway open during the winter season, the justification for this was that the loss could be recouped from next summer's business. Frequently, also, railways were called upon to make special concessions in rates to meet temporary distressed conditions such as drought. These special burdens carried by the railways were not onerous so long as the railways were able to assess charges on the average to cover the cost.

Now the motor vehicles and the highway, acting in combination, had changed the situation. The highway was provided by the state and at a cost to the motor truck much less than its real cost. The trucks represented relatively small capital investments and the industry was so young that rates of wages, hours of labor and working conditions were still in a chaotic state but at a low level. In addition, the trucker was able to avoid the carriage of bulky and low value commodities. These the railways often carried at a charge of less than one-half cent per ton per mile.

The trucker could concentrate on the high-grade commodities where the charge for transportation by railway would be from 10 to 15 cents per ton per mile and, in addition, the trucker was under no obligation to maintain a service unremunerative or seasonal in nature.

Last winter the Canadian National spent \$70,000 in maintaining service on a certain branch line in the maritimes. Over \$35,000 was spent in clearing snow and ice. The total revenue from that branch line during the winter months did not exceed the cost of snow removal alone, to say nothing of the provision of train service. Yet this branch line was subjected to highway competition for over two-thirds of the year.

Mr. Fairweather said that the provincial governments were in the transport business in a big way and he suggested that they might very well see to it that they were receiving in return from this industry what the expense had been to the state. In 1934 total maritime provinces highway costs amounted to over \$9,000,000 while the gross revenues from motor vehicle license, gasoline taxes, etc., amounted to only about \$4,000,000.

Placed On Free List

Duty On Indian Corn Cancelled Until End Of Year

Due to drought and other causes available supplies of Indian corn in Canada have become depleted. Consequently up to the end of the year this commodity will be imported into Canada from treaty countries duty-free. This was announced by Hon. J. L. Halsey, revenue minister.

This means that Indian corn now may be imported with the duty of 10 cents per bushel intermediate tariff eliminated.

Under the French treaty Indian corn was subject to an impost of 25 cents a bushel, and, under the United States Trade pact 20 cents. The general tariff rate is 25 cents a bushel.

Word Has Been Banished

You cannot ask for a "sandwich" in Italy any more. It has been announced in Rome that the word has been banished from the Italian language because it owes its origin to a famous earl in a "sanctionist" country. Now it will be known as "pampleni," which means filled bread.

Brazil's 1936-37 coffee crop will fill over 21,000,000 bags.

Eskimos Are Enthusiastic

See Abundance Of Food And Clothing In Reindeer Herd

The economic security of Canada's Eskimo population may rest in a herd of 3,800 reindeer quietly browsing on the barren lands of the Mackenzie River district under the watchful eyes of government herds-men.

Harvey W. Nesbitt, for the past two years superintendent of the government reindeer station near Ak-lavik, is in Ottawa on furlough, firm in the conviction the big herd will revolutionize living conditions in the Arctic.

Within a year or two the herd will be big enough to split into sections, and Nesbitt believes the time will come when reindeer will be scattered throughout the barren lands, a new reservoir of food and clothing for Eskimo, trader, trapper and missionary.

In the Arctic, a reindeer is a sort of walking clothing store and butcher shop for the natives. Each carcass dresses about 150 pounds, and the skin makes the finest clothing. Nesbitt, even after two years of it, claims the meat is tastier than beef, lamb or pork, and he says he never tires of it.

The Eskimo, Nesbitt says, are enthusiastic about the reindeer experiment, and there is no shortage of men willing to be trained as herds-men. They can see security for themselves in the big herd, abundance of food and clothing.

As a parting suggestion, Nesbitt said it might be a good idea for Olympic scouts to see his herds-men before selecting Canada's next ski team. Every day in the long winter months the Lapps and Eskimo travel 25 to 30 miles on skis over the tundra, up and down the hills, and "they can show some of your eastern skiers a thing or two about jumping and cross-country work."

League Against Rheumatism

Form Saskatchewan Branch Of Society For Study And Control Of This Disease

Organization of a Saskatchewan branch of the Canadian Society for the Study and Control of Rheumatic Disease was set under way at Saskatoon by resolution of the Saskatchewan Medical Association in convention. A committee, under the chairmanship of Dr. Duncan Croll, Saskatoon, was appointed to collect data so that comprehensive statistics might be available for the national organization.

Members of the committee are: Dr. B. M. Baltzan, Saskatoon; Dr. W. A. Harvie, Regina; Dr. R. W. Kirby, Prince Albert; and Dr. F. D. McCulloch, Moose Jaw.

Formation of the new provincial organization followed establishment of the Canadian body last February to affiliate with the International League Against Rheumatism, having headquarters in Amsterdam.

Glass Office Building

New Style Structure To Be Erected In New York

The world's first glass office building, five storeys tall, will be erected on Fifth avenue and nobody inside above the ground floor will be able to see outdoors.

Walled in behind glass tiles, the occupants will receive 78 per cent. of the outdoor light. The place will be windowless, except for five show windows on the ground floor.

The plans were announced by the Corning Glass Works, which will own and erect the structure. It will stand at the southwest corner of Fifth avenue and 56th street, in one of New York's swankiest shopping districts.

A Clever Love Bird

That he has the cleverest love bird in the world is the claim of B. Perkins, a barber of Sydney, Australia. It is three inches long and can pull a match from a box and present it to a customer, saying "O.K. Chief" as it does so. The bird sleeps in a shaving mug, and on cold days it perches on the rim of a cup of tea, to keep warm in the steam.

Skywriter Makes Error

Skywriting Al Stinls slipped while Montrealers watched in wonderment as he gave them their first sight of air skywriting. Criticism came from a spectator gazing upward from a downtown street. "Heck," said the spectator, "He's dotted an upper case T."

King Edward's Pilot

Is Regarded As A Very Safe And Thorough Airman

Captain of the King's Flight! Flight-Lieutenant Edward Hedley Fielden, upon whose muscular shoulders rests the enormous responsibility of flying King Edward VIII, safely, bears his dashing title casually—as casually as he refers to his Lord.

"My boss," he calls the king. This 33-year-old pilot, who holds the distinction of being the first to pilot a British monarch, is the envy of his fellows, and a pleasing sight for feminine eyes. Fielden is strong, silent, self-effacing and good-looking in the spruce, close-cropped manner reminiscent of the British army breed. He speaks in the clipped authoritative voice of the thoroughly disciplined soldier.

He is Edward's sole pilot, and his title was given him this summer in line with the king's emphasis on air travel.

Safe and thorough, Fielden has been schooled in the non-risk air school. Known to his intimates as "Mouse", he lives quietly at the Hendon Air Force mess—at the constant beck and call of his royal master.

The king's plane has a luxurious seating accommodation of five seats, radio, luggage department, refreshment canteen, writing bureau, and cruises at 135 miles per hour with an 800-mile range. It is painted in the Brigade of Guards colors—dark red and blue.

The Captain of the King's Flight now has carried out more than 2,000 hours of flying, and the king himself, no novice, has piloted dozens of machines and has the insignia of an accredited Royal Air Force pilot honestly earned during World War days.

Extremely modest he prefers to be called "mister." He says it's part of his job to keep in good health.

In 1929 he was awarded the Air Force Cross for distinguished peacetime flying. He has never won a race, but in 1932 he was second in the King's Cup air race when he piloted the Prince of Wales' "Comper Swift". That same year he set a new cross-England record when he flew the Prince's machine from Liverpool to Skegness, a distance of 136 miles, in 49 minutes, or 2.7 miles per minute.

Too Young To Qualify

Twenty-Two Peers Cannot Take Part In Coronation

No fewer than twenty-two peers will have cause to regret the day they were born when they realize that because they will be under 21 on May 12, 1937, they will be ineligible to take part in the Coronation ceremony.

Lord Townshend, who spent his holidays at his country seat in Norfolk, will be 20 and 364 days old—his 21st birthday is on May 13.

Lord Oxford will qualify by less than a month, as he reaches his majority on April 22.

One peer under 21 will steal a march on the others. Lord Herschell, who is 13, is a Page of Honor to the King and will walk close behind His Majesty during the ceremony, dressed in a scarlet coat with ruffles and breeches of white satin.

It is thought that the "heated blood" engendered by the bull's blind rage poisons its flesh for human consumption, so meat from bulls killed in Mexican bull fights is never sold.

Potash From Dead Sea

Great Britain Closely Watches Process At New Plant

The Dead Sea, the strangest body of water in the world, is slowly coming to life again.

Lying 1,300 feet below the level of the Mediterranean, receiving an inflow of 6,000,000 tons of water daily from the River Jordan without an outlet, the sea has puzzled archaeologists and geologists for centuries.

Today, where once Sodom and Gomorrah stood, where David took refuge, where Herod and Marianne fled when the Parthians captured Jerusalem in 42 B.C., modern science is taking out potash and bromine—and the Dead Sea area is alive with activity.

Once barren and thought useless, the sea's shoreline is ringing with the sound of hammers as a new potash works, with a 30,000-ton capacity annually, has brought on a building boom.

Resorts put up by British capital, in and around the Dead Sea, have been bringing thousands of visitors to the sea each winter, and homes and works buildings are springing up like mushrooms.

Great Britain is closely watching the potash process, for the Dead Sea is her only source of potash and bromine in the empire—and it will come in handy if war sweeps Europe and the world again.

The process, though simple because of the natural function of the sea itself, is ticklish and is watched from beginning to end by three shifts of 430 laborers.

The brine is pumped from the bottom of the sea through wooden pipes into pans which are arranged to allow a slow movement of the brine from one pan to the next. In the course of the flow, the brine becomes more and more concentrated until common salt precipitates. The next step produces carnallite, or crude potash, which is shipped to refineries.

By contrast to ordinary ocean water, which contains from 4 to 6 per cent. salts, the Dead Sea contains 25 per cent. No animal life is possible in its water, and very little vegetable life.

The evaporation from the sea, its only outlet from the heavy inflow, causes strange-looking blue-white clouds to float overhead, giving it a fantastic sheen from a distance.

Realism In Films

Traveller In Hollywood Sees How It Is Produced

A traveller, who was in Hollywood, reports that he was taken on a tour of the M-G-M studios, where he was shown dozens and dozens of sets, each one perfectly enormous in size and exact in detail; a submarine, several square blocks of eighteenth-century Paris (for "A Tale of Two Cities"), a whole battleship in an artificial pond, a night club, and (for "Romeo and Juliet") a pretty convincing mountain. Then the guide took him over to a corner where there were two kitchen tables, one covered with a thin layer of dirt in which were stuck little pieces of straw, the other just covered with dirt. "We used these in 'The Good Earth'," the guide said. "The rice fields of China before and after the plague."—The New Yorker.

Brazil has supplanted the United States as a supplier of raw cotton to Germany.

Dish Towel Dogs Are "Up To Tricks"

PATTERN 5652

These frisky, dish-towel dogs are indeed "up to tricks," but wait till the children see them, for they'll all want to do the dishes. Just think what a practical gift or Fair donation this set of seven would make. It's cross stitch and outline, and using one color of floss gives a silhouette effect. In pattern 5652 you will find a transfer pattern of seven motifs (one for each day of the week) averaging 4 1/4 x 7 1/4 inches; material requirements; illustrations of all stitches needed; color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Many Uses Of Soy Beans Results In Increasing Interest In This Legume

Revealed In Action

Things Which Keep Tissues Alive Are Merely Chemical

Yale University has solved the mystery of enzymes, invisible things which keep man's tissues alive, by showing one of them at work for the first time. The enzyme revealed itself as a mere chemical, prosaic in action as soap in water. For many years scientists suspected that enzymes were alive.

The enzyme action was made visible by Dr. Kurt G. Stern, visiting lecturer in physiological chemistry. He used the enzyme catalase. This is a red-colored protein, plentiful in the liver, but also distributed in small amounts through every cell in the body.

He used a spectroscope to see the catalase in action in a transparent solution. A photo-electric tube recorded the speed of the chemical action of the enzyme exactly the same as an electro-cardiograph records the beating of an invisible heart.

The catalase could be seen changing hydrogen peroxide into water and into gaseous oxygen. Although some steps in the transformation were too rapid for the eye, the photo-electric tube recorded them in fifths of a second.

Dr. Stern also watched other chemical changes as they were made, step by step, by the enzyme. All these changes were observed in a test tube.

Changes Are Noted

Report Says That Family Life Has Come Back In Russia

Writing his observations of progress in Russia, in connection with the proposed new constitution, an Associated Press correspondent says the family life has come back into its own as a recognized basic unit of society.

Parents are held increasingly responsible for maintenance and education of their children and "fresh influence" is stressed as one of the most important factors in bringing up the new Bolsheviks.

Free and easy divorce is gone. Divorces are now taxed and both parties must appear before the decree is granted. Divorced parents must support their children or go to prison.

Simplicity of dress is no longer considered essential to the good Bolshevik. Silks for the women, white collars and ties for the men have long since won public favor.

Titles have been restored in the army, the office of housewife is held in high esteem and there are dozens of other developments tending to make life in the Soviet union similar to that in "bourgeois" countries.

Directing Chinese Dress

Head Of New Life Movement Issues Orders To Women

Feminine China, which was fast adopting western styles and ultra-modern dress, has been ordered by General Chiang Kaishek, head of the "New Life Movement", which aims at the regeneration of the Chinese people, to return to the simple dress worn by China's grandmothers.

In future, according to China's dictator-reformer, whose wife, May Ling, was educated at Wellesley college, Chinese women and girls must wear garments covering the entire body. Even the arms and ankles must be covered.

The new "Ten Commandments" which the national government says must be followed under pain of punishment, forbids women and girls certain customs and clothes.

Women of southern China revolted recently against similar rules. They now enjoy full freedom of dress.

Liked Work In Canada

The British motion picture group which has been at work on location during the past summer at Revelstoke, B.C., sailed for home recently aboard the Empress of Britain. Milton Rosmer, director, was filled with enthusiasm over his first Canadian picture-making experience and said, "professional extras could not have been better than the Canadians were."

Large Power Station

London's largest power station, situated on the riverside at Fulham, officially opened on September 29. It has taken more than four years to build, has cost 5 1/2 million pounds, and will supply the whole of the south-east England with electric current.

The world production of this valuable legume is probably in excess of seven million tons annually. Manchuria, the largest producer, is followed by Japan and the United States. Statistics relative to the Russian crop are not available.

Canadian production is, as yet, too small to exert much influence on the world market, but there is an increasing interest in the soy bean crop. Varieties suitable for domestic production are gradually replacing the imported beans.

Chemical analyses have been conducted for some years by the Division of Chemistry, Central Experimental Farm. The protein content, it has been found ranges from approximately 31 per cent. to 39 per cent., while the oil constitutes from 14 per cent. to 18.5 per cent. of the bean. Of two varieties, having characteristics suitable for Canadian cultivation, the unsaturated acids in the oil range from 82.2 per cent. to 84.3 per cent. The iodine numbers show a variation from 125.0 to 134.2. These data indicate the value of the oil for industrial applications, where readily oxidizable oils are demanded. The inorganic salts containing valuable mineral matter, approximate 5 per cent. of the weight of the bean.

The uses of soy beans are many and varied. Considerable amounts of the oil are used in paint mixture in conjunction with linseed and tung oils. A prominent automobile manufacturer, who maintains a staff of chemists, now finishes his product by utilizing an enamel, the base of which is a synthetic resin produced from the soy bean. The resin also finds application in the manufacture of electrical equipment. Because of its drying properties, the linoleum and oldcloth industries use large amounts of soy bean oil.

Much of the oil finds its way to the soap vats. Here it is especially suitable for automobile soaps. Glycerine is produced as a by-product.

Some other uses for the oil are, as rubber substitutes, celluloid, printers' ink, explosives, salad oil, lighting and lubricating oils, as core binders for foundry work. The partly hydrogenated crude oil has been found useful as a stabilizer for shortening compounds.

Soy bean oil contains lecithin, a phosphorized fat, and is displacing egg yolk to some extent as a source of this material used in medicine. Of interest too, along medical lines, is the disappearance of food allergies, particularly those caused by protein, following the ingestion of specially refined oil.

The beans furnished a homegrown nitrogenous concentrate for animal feeding, being a source of protein for sheep, beef and dairy cattle and brood sows. It should, however, be used with caution in the rations of market hogs, since it produces soft pork.

As a protein supplement, the oil meal is of value in the rations of beef cattle, dairy cows, sheep and poultry. A simple mineral mixture is advantageously added, since the meal is deficient in this respect.

For human use, the beans provide many forms of foodstuffs. The green beans may be served as a vegetable or in salads. Flour made from processed beans, high in fat content, is now found in the products of many bakeries. Since starch is absent, soy bean flour is marketed in diabetic foods.

The dried beans have been used as a coffee substitute, in soups, as a source of casein, as a milk substitute and cheese.

As the composition of both the fat and the proteins of soy beans more nearly approach the composition of these constituents found in animals, soy beans could be used to replace meat in the diet.

The uses of this interesting plant are finding increasing application.

Bees Attack Horse

A horse kicked over a hive in Naponkoski village, central Finland, and was stung to death by the furious bees. A peasant who rushed to the horse's rescue was also attacked and so badly stung that he had to be taken to hospital. His condition was stated to be precarious.

Travel in England by rail, bus and street car last year averaged 435 journeys for every man, woman and child.

France is the principal world source of bauxite, from which aluminum is derived.

Rumania prohibits all transactions in foreign exchange, except through its national bank.

The SNAPSHOT GUILD

WHAT DO YOU KNOW?

Seems to be moonlight, but it's sunlight. A snapshot with a small lens opening, preferably when the sun is low, will get pictures like this.

Do you know that—

Slight overexposure is always preferable to underexposure?

A small stop opening must be used when both nearby and distant objects are to be sharply defined at the same time?

For good composition, the object of principal interest should never be placed in the center of a picture?

In striving for pictorial effect, it is best not to hurry in making the exposure unless moving objects demand immediate action, as a little time spent in selecting the viewpoint proves a good investment?

Highlights are the portions of a picture upon which the greatest amount of light is centered and reflected—the densest portion of the negative and the lightest portion of the print?

Enlarging from sections of your choice negatives is a source of great satisfaction, and that many exhibition prints are prepared in this way from negatives which, taken as a whole, lack just the right spacing or arrangement?

A diagonal rather than a full face-view of a building is usually more pleasing, particularly if a portion of the building is in shadow?

If, when making portraits, a hand, arm or leg of the subject is extended much beyond the body toward the camera, it will appear abnormally large in the picture?

In using a portrait attachment for close-ups, a piece of string knotted at determined distances and kept in the box with the attachment, is more convenient than looking for a yardstick or tape measure to fix the distance between camera and subject?

Most so-called moonlight pictures are made in the daytime and that a snapshot exposure, with a comparatively small lens opening, when the sun is near the horizon will produce such a picture?

It is best to have film developed promptly after the last exposure is made?

More pleasure comes from keeping your prints mounted in an album than keeping them loosely anywhere, perhaps to be lost or damaged?

Regrets and annoyance come from not keeping your negatives in orderly fashion in a negative album so that, when you want new prints of any picture, you know where the negative is?

109 JOHN VAN GUILDER.

entirely satisfactory and needs re-arrangement.
Heads of the B.C. Hospital Association, who discussed the matter with government experts this week are under the impression that grant to some hospitals may be reduced during the next year.

TWO SHOULDN'T BE SAD OVER A BARGAIN

"Some Canadians have wondered if our sharp Yankee friends to the south did not get the best of the bargain in the recent reciprocal trade agreement. Well, if one fellow thinks he got decidedly the worst of a bargain, then

the other fellow must have the best of it and should not complain.

Read the following from a United States paper and cheer up. "Canada Gets the Breaks—Under the operation, of the new reciprocal trade tariffs Canada has increased its imports into this country 23% in six

For safety's sake, the individual investors, just the same as the large corporations should have their securities frequently examined and reported upon from time to time

As markets and business conditions are continually changing and causing fluctuations in investment values, loss can be avoided, value and income increased by judicious exchanges, and by maintaining proper diversification of security holdings

Bonds are not usually quoted on Canadian Stock Exchange, but Market prices can be obtained through Geo. E. Gudewill & Co., Ltd.

Our analytical service is freely at the disposal of investors. Ask our Fraser Valley representative, Mr. C. J. Dill to secure report on any security in which you are interested

GEORGE E. GUDEWILL & CO., LTD.

months, with about half as much of an agricultural products on which the American duties were reduced in the tax showed an increase of 68%, jumping from \$6,036,000 to \$10,167,000. The principal items of these imports that increased in six months of the Hull semi-free trade scheme were cattle, live poultry, cheese, turnips, sweet potatoes and maple sugar.

Is it any wonder that the United States farm belt does not like these trade treaties? —Ashcroft Journal.

ORANGEMEN PLANNING INDOOR CARNIVAL

Something a little different is the plan of the Loyal Orange Lodge in connection with their first annual indoor carnival, to be held in the local Orange hall three nights next week. Instead of the usual advance sale of tickets admission will be free each night. As each adult enters the hall he or she will be given a numbered ticket, this also being free. Some time during the evening duplicates of these numbers will be drawn and merchandise or cash prizes distributed accordingly. One special provision is that the ticket holder must be present when the drawing is made or the ticket is useless. The drawing continues until the allotted prizes are given out among those in attendance.

A truck load of equipment has been brought in to be used in conducting several games. Both floors will be used for the carnival. The net proceeds of the event will be devoted to charitable and welfare work by the lodge.

O. E. S. Hold Successful Bazaar (Contributed)

The officers and members of Electa Chapter No. 20, O. E. S. held their annual tea and sale of home work on Saturday afternoon in the I.O.O.F. hall. Streamers in the lodge colors and gay bouquets on the tea tables made effective decorations.

Tea arrangements were in charge of Mesdames H. G. Finch, G. Grant, G. Preston, D. Stein, Misses Mabel Finlay, Margaret Finch, Effie Roberts serving the guests.

In charge of the tea equipage during the afternoon were Mesdames Robinson, Chilliwack, Owen, Mission, Wise, Langley and Miles, Sumas, Wn. Woods and fancy work in charge of Mesdames C. Walker and J. Anderson; sewing, Mesdames McBeth and Lamont; novelties, Miss V. Hunt; candy, Mrs. A. Finlay and Miss Doreen Anderson; home cooking, Mesdames J. Wilson and G. Reith.

Mrs. Golden was in charge of the drawing for a cushion, which was won by Mrs. Patterson.

A fruit cake donated by Mrs. Wilson was won by Mrs. McPhee. This contest was in charge of Mrs. Roberts Mrs. C. Truseler, as tea-cup reader, had a busy afternoon.

Muscle was provided by Misses Peggy Anderson and Margaret Finch, G. Grant and M. Ralston.

HEALTH INSURANCE SCHEME MAY CUT HOSPITAL GRANTS

British Columbia hospitals may have to face a revision of their government grants, as a result of an investigation now being completed by experts of the provincial secretary's department. Legislation on this subject may be introduced at the fall session of the Legislature, which opens this week.

The inauguration of health insurance, the government believes, will alter the financial position of many hospitals, since large numbers of patients who could not pay for hospitalization in the past will pay for it, in the future through the insurance fund. In addition, experts feel that the existing system of grants is not
